

# **Information Systems 107**

## ***Programming and Application Development***

### **Programming Project 3**

#### Project Directions

This is an individual programming project.

For this project you will complete Chapter 3, Project 2, Repair Bill as described on pages 110 and 111. You will create a form and write the event code to create a program to display an auto repair bill. The form is shown on Figure 3.62. The program requirements and calculations are described on pages 110 and 111. Choose meaningful names for the form, the controls on the form, and the event procedure variables.

#### Grading

Hard copy

- You do not need to print out any part of your project for grading.

Executable files

- Submit a folder named LastNamePP3 (in zip format) that contains the project folder with all of its subfolders and files. Your last name is included in the folder name so that each folder is unique. Send the folder by e-mail to the professor before the due date.
