Programming and Application Development

Programming Project 5

Project Directions

This is an individual programming project.

For this project you will complete Chapter 5, Project 3, Furniture Order as described on pages 237 and 238. You will create a form and write the event code to create a program to output a furniture order invoice based on data entered by a user. The form is shown in Figure 5.44. The program requirements and calculations are described on page 237. Choose meaningful names for the form, the controls on the form, and the event procedure variables.

Grading

Hard copy

- You do not need to print out any part of your project for grading.

Executable files

- Create a folder named LastNamePP5 (in zip format) that will contain all of the files for your project. Your last name is included in the folder name so that each folder name is unique.
- Upload your zipped folder in the course Blackboard page content area in the assignment named Upload Completed PP5 Folder.

90 points possible
